Summary of Qualifications

Technical Skills:

- Design Skill: Adobe Creative Suite (Photoshop, Illustrator), Sketch, Figma, InVision
- User Research and Analysis
- Graphic Design and Typography: Color Theory, Icon Design, Typography Design

Soft Skills:

- Design Trends Awareness
- Innovative Thinking
- Communication Skills
- User Interface Optimization/ User Experience Improvement
- Project Management and Collaboration

Education

Bachelor of Science in Interaction Design, ArtCenter College of Design

September 2023 - Expected 2028

Bachelor of Global Business And Digital Art, University of Waterloo,

September 2023 - April 2025

Summer University Program, Cornell University SCE Program

July 2023

Professional Experience

UX/UI Designer

Beijing Zhongke Huilian Information Technology Co.,Ltd. | May 2024 – August 2024

- Assisted in user interaction and graphic design, adapting designs to user standards.
- Contributed to web and wireframe design, ensuring seamless progression from low- to high-fidelity prototypes while integrating UX principles.
- Worked with the Interaction Design Department to align aesthetics with functionality.
- Collaborated with senior designers to refine concepts and fostered a positive, supportive team environment.
- Conducted user research and usability testing to inform design decisions.
- Integrated user feedback into revisions and collaborated with senior colleagues to enhance user-centered design solutions.

UX/UI Designer

Glou.co | May 2022 – July 2022

- Led and contributed to user-centric interface design, ensuring a seamless and visually appealing experience.
- Translated concepts into prototypes, refining designs through user feedback.
- Played a key role in brainstorming and constructively critiquing designsdesign critiques within cross-functional teams, ensuring alignment between design and development goals.
- Conducted user interviews and usability testing, integrating feedback into design iterations to align with user expectations.

Academic Project

Customer Experience Design | Waterloo University, September 2023 - December 2023

- Compiled and organized market research findings into systematic datasets.
- Utilized charts and graphics to present insights, transforming complex data into clear visual formats using tools like Adobe Illustrator and Figma.
- Led app design from concept to final product, creating icons and graphical elements.

- Collaborated with team members and external groups to ensure the design was both user-friendly and visually appealing.

Co-hopp Design | Waterloo University, September 2024 - December 2024

- Collaborated with team members to organize findings from market research (surveys, focus groups, interviews) and standardize it into a centralized dataset, enabling more efficient trend tracking, metric comparison, and identification of user pain points.
- Created wireframes, tested user flows, and defined branding elements using Adobe Illustrator and Figma.
- Established a cohesive visual identity with color palettes, typography, and layouts. Integrated user feedback to refine navigation and enhance usability.
- Coordinated with developers to ensure seamless design implementation.
